* If your network requires the 15E or 30E models, simply order the E1 model and 2x part number 77000482.

An Exclusive Offer For Verizon Wireless

POWER UP YOUR NETWORK FASTER THAN EVER

QUICK SHIP CABLE PROGRAM

THE QUICK SHIP 2.0 PROGRAM

To stay ahead of the competition, you need the power to accelerate deployments. And you need a partner that can help you get the job done.

RFS is committed to powering your success. And we've upgraded our Quick Ship program to help you achieve more, faster. With our Quick Ship 2.0 program, we'll do everything we can to ensure you receive our industry-leading HYBRIFLEX hybrid cables, jumpers and accessories in two weeks from the order date.

FASTER ACCESS TO THE BEST HYBRID CABLES IN THE INDUSTRY

Our Quick Ship 2.0 program cuts HYBRIFLEX lead times in half compared to our initial Quick Ship program. And it applies to our most popular HYBRIFLEX cable and jumper configurations in a variety of lengths:

- NEW! 9 lengths of 12x24 cables
- 11 lengths of 6x12 cables
- 3 lengths of 1x1 jumpers
- 2 lengths of 1x2 jumpers
- 1 length of 2x1 Y-splice jumper

RFS has carefully chosen the Quick Ship 2.0 lengths based on historical data, also keeping in mind that the Raycap distribution boxes can spool a maximum length of 30ft of fiber. This way, we ensure that all possible "excess length" will be perfectly accommodated inside the box. We'll also do our best to make sure you receive your HYBRIFLEX accessories — distribution boxes, ground kits, clamps and tools — in two weeks¹.

EASY ORDERING AND FULL SUPPORT

Our user-friendly Bill of Materials (BOM) Configurator highlights HYBRIFLEX lengths that are eligible for Quick Ship 2.0 before you place your order. In most cases, the required accessories are built into the BOM. But, for longer cable lengths, be sure to consider whether you need additional accessories, such as hangers.

We also offer technical support, field and classroom training and BOM building assistance for all Verizon markets.

AN EXCLUSIVE PROGRAM FOR VERIZON WIRELESS CUSTOMERS

The HYBRIFLEX Quick Ship 2.0 program is available only to Verizon Wireless and its affiliates. There are no additional costs and no hidden fees with this program. It's just one way we're showing how much we value our partnership.

Frequently Asked Questions

- Q.** How do I know which lengths and models are part of the Quick Ship 2.0 program?
- A.** RFS Customer Service representatives will recommend Quick Ship 2.0 lengths when you place an order or request a quote for a standard length. In addition, the RFS BOM Configurator will highlight Quick Ship 2.0 cable lengths when you, or our technical team, are designing your network.
- Q.** Your program and staff recommends longer cable lengths. For example, I ordered a 40-foot, 6x12 cable and your staff recommended a 60-foot model. Why did they not suggest the 30-foot model?
- A.** We've asked our Customer Service representatives to suggest the next longer length of Quick Ship 2.0 cables because RFS wants to ensure you are not going to end up with a cable assembly that is too short. However, if you are confident that the shorter assembly will fit your needs, please let us know.
- Q.** Are there other longer lengths available?
- A.** Yes, but they are not included in the Quick Ship 2.0 program.
- Q.** Now that I've chosen a longer length, I'm not sure I have enough accessories. What should I do?
- A.** Use the BOM Configurator to recalculate the required accessory quantities, or contact RFS Customer Solutions Management at 1.800.659.1880.
- Q.** What is the lead time for non-Quick Ship 2.0 lengths?
- A.** RFS prioritizes Quick Ship 2.0 lengths so lead times for other lengths may be longer (Contact Sales).
- Q.** What about the HYBRIFLEX accessories¹ on my order? Will I have to manage multiple shipments?
- A.** No! These items are ALSO available in two weeks and will be shipped with your cable order.
- Q.** How do I learn more about the Quick Ship 2.0 program?
- A.** Contact your RFS District Sales Manager, call RFS Customer Service at 1.800.321.4700 or email our sales department at sales.americas@rfsworld.com.

¹ Base Station Antennas and Filter Products are not included in this program.
