

RFS -Fiber and Power Solutions 2020.

The background of the slide is a dark gray, textured surface with a repeating pattern of raised, diamond-shaped or triangular protrusions, creating a 3D effect that resembles a modern antenna array or a futuristic architectural facade.

WE SIMPLIFY 5G

THE EVOLUTION TO

COMPANY PROFILE

5G IS A REALITY

- We simplify the evolution from 4G to 5G, with a **complete 5G-ready portfolio** of cables, base station antennas and microwave solutions.

SITE SIMPLIFICATION

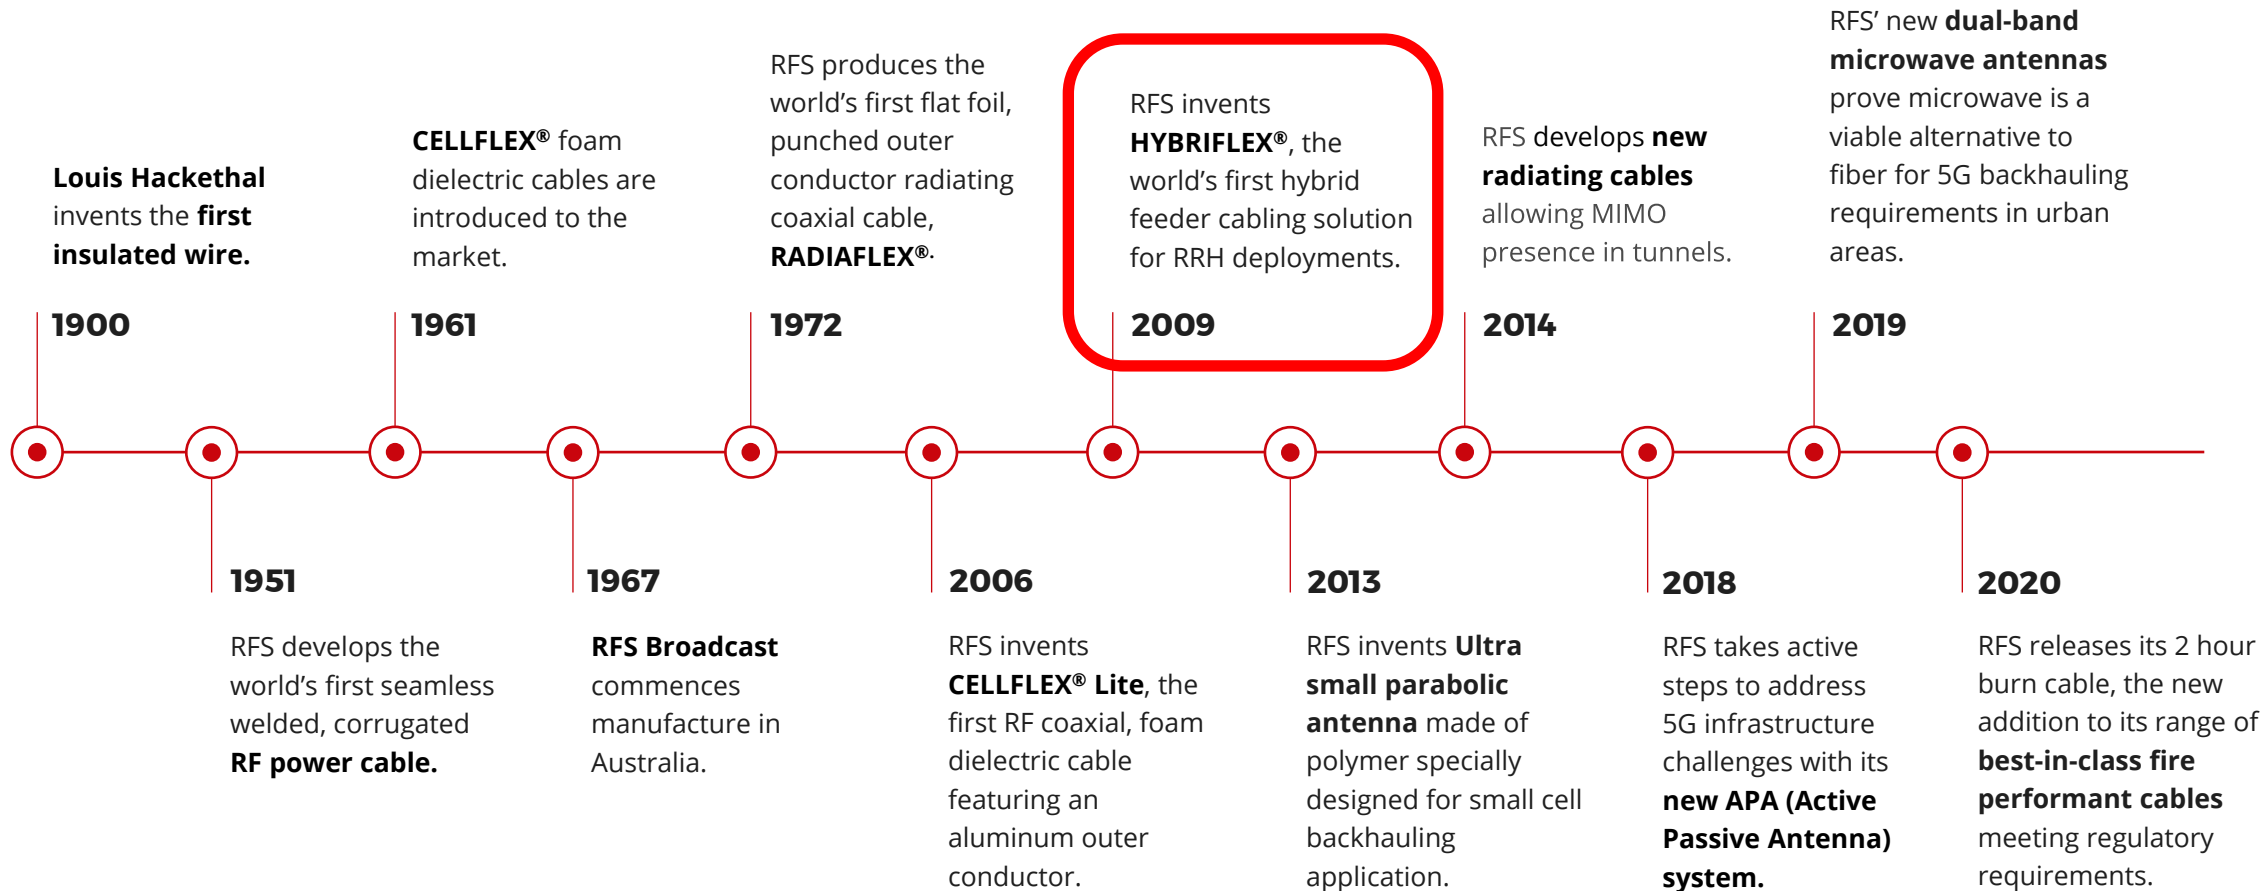

- We enable the **site simplification** in both macro and small cell sites with low visual impact antennas and 5G high capacity microwave links.

EASE OF INSTALLATION

- We **ease the installation**, through multiband base station antennas with optimized weight and reliability.

120 YEARS OF INVENTIONS.

Why RFS for Fiber and Power.

RFS Fiber and Power provides a comprehensive solution set to help you reduce CAPEX yet expand network capacity :

- HYBRIFLEX Riser and Jumper cables – robust design
- Optical Fiber Only Jumpers
- DC Wire
- CPRI Portfolio
- Junction/Distribution Boxes with or without surge protection
- Accessory Portfolio

RFS simplifies the evolution of your 5G wireless network!

Since 2009, RFS manufactured WW:

- *+65 million ft of HYBRIFLEX – more than 3 times earth radius*
- *+11,500,000 fiber terminations*

FTTA Infrastructure Solutions.

Main characteristics

- HyBRIFLEX® Hybrid: Customer tailored solution combining DC & fiber optic wires
- Separate: Mix of customer tailored and off-the-shelf separate DC and F/O cables
- DC (Cu) makes up to 70% of cost
- Various F/O connectors provided: LC, MPO, ODC, ODVA

illustrations

- ### Power Cables
- Multi-conductor power cable assemblies for powering the RRH
 - High conductor strand count options for flexible cables
 - Standard 19 strand options available
 - 4AWG up to 20 AWG

- ### Enclosure
- Optional devices used as interface between main DC and/or F/O cables and jumpers
 - Provides a clean, futureproof FTTA design
 - Can be integrated with Surge Protection
 - Varies from simple interconnect boxes to complex devices

- ### Fiber Optic Assemblies
- Bundled, multi-fiber count assemblies for FTTA solutions
 - Single pair assemblies for racks, interconnects
 - Numerous connector styles
 - Rugged construction
 - Various F/O connectors provided: LC, MPO, ODC, ODVA

What is HYBRIFLEX.

- Any bundle and/or combination of individual components
 - Optical fiber
 - Power wire (DC or AC applications)
 - Ethernet, twisted pair
 - Coaxial cable
- RFS Factory Terminated
- Armored or unarmored
 - Aluminum corrugated
 - Copper wrap

First To Market & Current Industry-Leading Design.

Why HYBRIFLEX® from RFS

- Excellent Reliability – Field Proven Fiber/DC Power Designs
- Robust aluminum corrugated or copper wrapped armor protections available
- Riser rated, UL Listed, CPR options for assemblies (indoor/outdoor)
- Designed to customer requirements

Minimize Installation Time And Costs

- Easy armor removal process (Kevlar Ripcord)
- Same accessories as coax cables
- Same installation procedures as coax cables
- Color-coded wires for easy site identification

RFS is a **total solution provider** offering a complete turn-key solution including fiber jumpers, fiber management, accessories, CPRI and much more

First To Market & Current Industry-Leading Design.

Best in class bend radius & robust armor

- Continuous robust armor design protects DC + fiber all over the run
- Min bend radius 12cm for 7/8", 15cm for 1-1/4", enables use in tight spaces
- 80% better bend radius than alternative construction methods (foil, etc.)

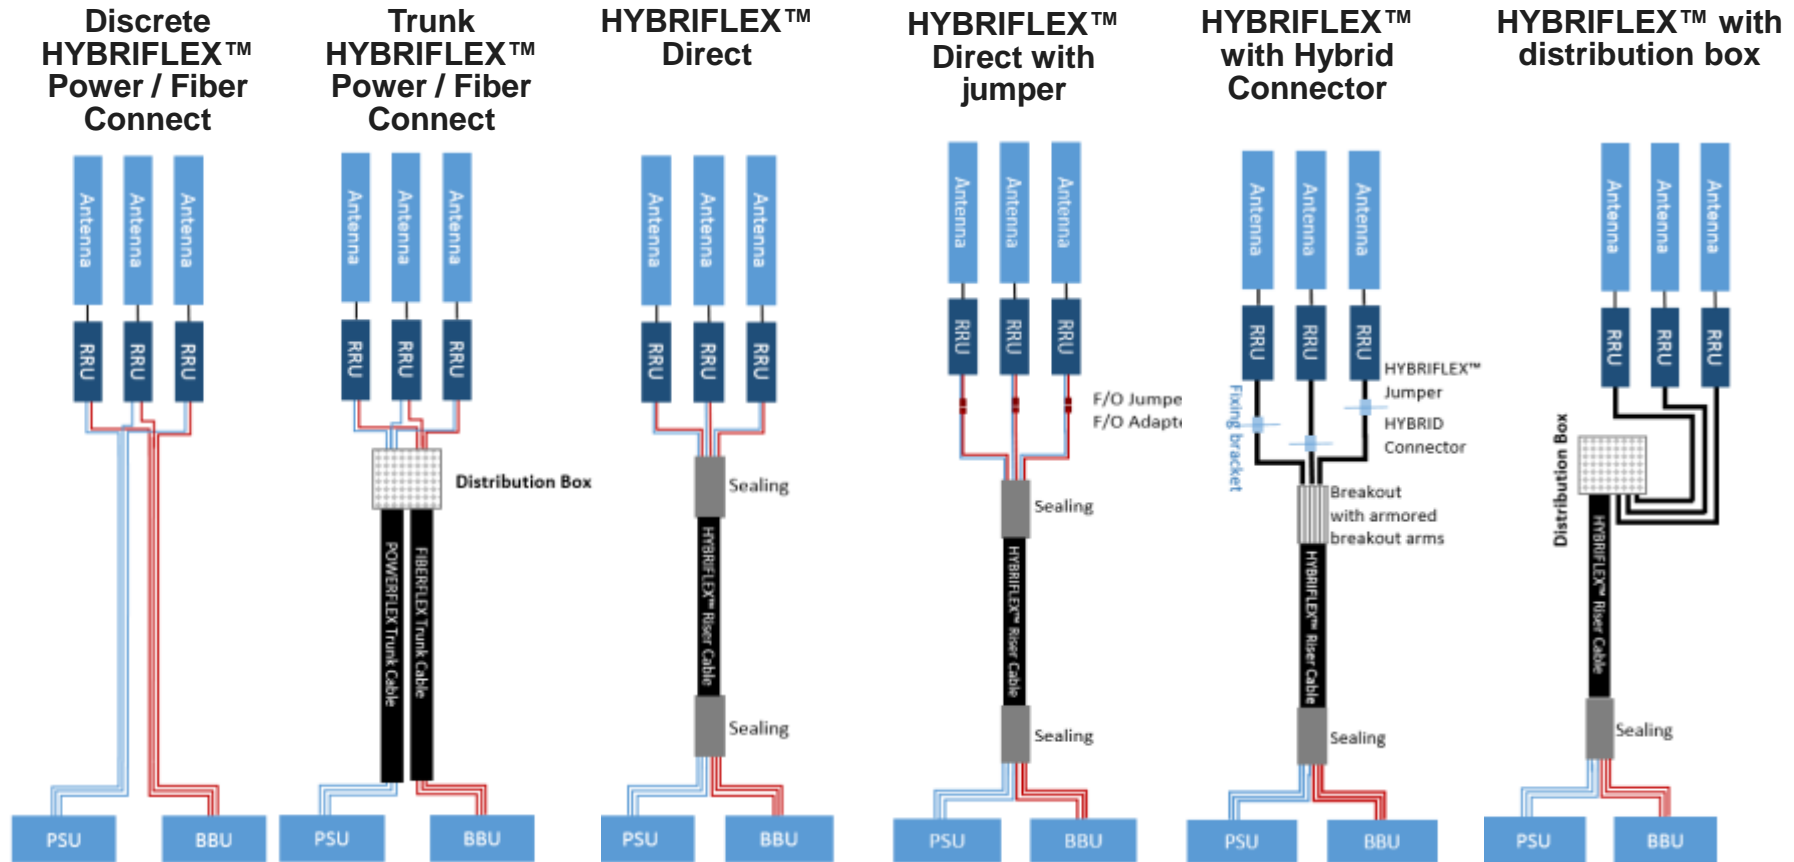

Durable, Easy-To-Install Accessory Line

- Field proven over decades
- RFS uses weather and corrosion resistant materials
- Avoids use of non-standard clamps using rubber inserts, which leads to possible installation issues

RFS offers the **most robust and reliable solution** with its corrugated armor and rugged outdoor fiber in addition to the **lowest market inductance** for the coaxial power wire design

RRU Cabling Applications - Overview.

Fiber Only Jumpers.

- Factory Terminated - LC, MPO, ODC, ODVA and others on request
- Armored or unarmored
- Single pair to multi-pair
- Bi-Directional (BiDi) Simplex Optical fiber options
- 100% factory tested

DC Power Wire.

- Single or multi-conductor
- Shielded or unshielded
- UL or non-UL

HCS - Hybrid Connectivity System.

- Hybrid Connector System: Two pairs F/O, one pair DC
- Easy to handle and fast to install: Field interconnection within 2 sec with high sealing class (IP 67)
- High quality: Factory assembled to HYBRIFLEX Jumper and to Riser Cable Breakout and factory tested
- High reliability: Connector designed close to MIL
- Excellent protection: mechanical and lightning- due to continuous corrugated aluminum armor of HYBRIFLEX Jumpers and Riser Cable breakouts.
- Future proof for multiple RRU's
- Eliminate the need for junction boxes

Enclosures - Junction Boxes.

- Designed to customer request
- Optical Fiber interconnect and fiber slack management
- DC Power termination with optional overvoltage surge protection
- IP67/IP68

CPRI Portfolio.

- Used for Interference Mitigation testing
- Recommended on every site
- Do not need to take the site down, nor climb tower in order to test
- 1RUCM-RFS-18CPRI-3M – Standard rear access CPRI Ports – Fully Loaded with (3) CPRI-6RRH-MOD-RFS modules
- 1RUCM-18CPRI-0MR1 - Reversed CPRI Ports - Fully loaded with (3) CPRI-6RRH-MOD-R1 modules
