

- The ACU-A20-SR Antenna Control Unit (ACU) is part of the complete RFS AISG compliant Optimizer RT® remote antenna control system. The ACU-A20-SR has a smaller mounting footprint than previous ACUs. This is important for multi-band antennas with several internally mounted ACUs.
- The Optimizer RT® remote antenna control system permits accurate antenna tilt operations to be conducted - without riggers or crane equipment - either from the tower base or the network management center.

FEATURES / BENEFITS

- Compliant with AISG standards
- Enables remote electrical tilt of antennas
- Smaller footprint than the ACU-A20-S
