

The hoisting grip consists of a wire mesh with 2 hoisting eyes, lace up version. Multiple use version covering several sizes.

FEATURES / BENEFITS**Antenna Transmission Line Installation**

- Hoisting stockings distribute the force during installation
- It holds the antenna transmission line by means of friction over their complete length
- The closed version (C-Type) is used when top connector is installed after the antenna transmission line is hoisted
- The open version (L-Type) is used where the top connector is installed prior to the hoisting

**External Document Links****Notes**
