

RFS heads to PMR Expo showcasing best in class mission critical communications solutions

Next week the RFS team will be heading out to PMR Expo, Europe's leading trade fair for secure communications. The event, which showcases the very best in mission-critical communication solutions, is being held at Koelnmesse with thousands expected to attend. We'll be at the show to talk about our full range of mission-critical solutions, Axel Schroeder, Commercial Product Manager Wireless Indoor Solutions tells us more.

When it comes to critical communications, PMR Expo has for over two decades been the go-to show to see the very best the industry has to offer. With a great mix of keynotes, panel discussions and over 140 exhibitors, this year's show again looks set to offer a range of interesting perspectives and insights from across the critical communications sector.

RFS will be on the ground with a range of our solutions and accessories that are being used by customers across the globe to address the challenges of mission-critical communications. This year we will focus on our flagship RADIAFLEX portfolio which celebrated 50 years since its invention at RFS in 1972. However, despite its long heritage, it has been a technology that has seen continuous evolution and innovation over the years, particularly when it comes to enabling our customers to overcome fire safety challenges.

The RADIAFLEX radiating cable delivers contoured RF coverage, offering consistent, reliable coverage in even the toughest environments without compromising on safety. It meets the highest European safety standards with all radiating cables rated CPR class B2ca s1a d0 a1 - the highest possible certification. Not only does this demonstrate the ability to maintain performance in extreme heat, the d0 subclass shows that RFS's cable does not drip in the event of a fire.

In addition, we will have on display a full range of accessories for RADIAFLEX installation and case studies to show the benefits of the technology in action.

If you're attending PMR Expo and would like to meet to hear more about our solutions, we'll be in Hall 10.2/E7 or email lea.gahl@rfsworld.com.

About RFS

Radio Frequency Systems (RFS) is a global designer and manufacturer of cable, antenna and tower systems, plus active and passive RF conditioning modules, providing total-package solutions for wireless infrastructure.

RFS serves OEMs, distributors, system integrators, operators and installers in the broadcast, wireless communications, land-mobile and microwave market sectors. As an ISO compliant organization with manufacturing and customer service facilities that span the globe, RFS offers cutting-edge engineering capabilities, superior field support and innovative product design. RFS is a leader in wireless infrastructure.
