

Desiccant cartridge kit R260 consisting of:

Straight rectangular waveguide section with PBR/UBR 260 flanges

Gas inlet adapter with G1/8" thread

Desiccant cartridge - in an airproofed can

Desiccant cartridge holder

Right angle adapter with G1/8" thread

Screw kit and O-Ring for PBR Flange,

Teflon Tape

Installation Instruction

FEATURES / BENEFITS

The RFS desiccant cartridge is a compact and economical solution designed to protect antenna/feeder systems against moisture. The desiccant cartridge is connected to the system and the humidity indicator will provide an early warning (long before link failure) if moisture has entered the system in spite of all the precautionary measures taken. In case of high humidity, the material inside the cartridge will be saturated. This is indicated if the colour changes from blue to violet of the material visible through the window in the front side of the desiccant.

Technical features

STRUCTURE

Type of Rectangular Waveguide Component	Desiccant Cartidge
Waveguide Size IEC (EIA)	R260 (WR34)
Flange A	PBR260
Flange B	UBR260
Flange Finish	Brass un-plated
Package Quantity	1

ELECTRICAL SPECIFICATIONS

Frequency Range	GHz	21.7 - 33
Minimum Return Loss (max. VSWR)	dB (VSWR)	26.4 (1.10)

MECHANICAL SPECIFICATIONS

Length	mm (in)	30 (1.2)
Length	111111 (111)	30 (1.2)

MATERIAL

Material	Rectangular waveguide section: Brass Gas inlet adapter: Brass nickel plated Right angle adapter: Brass nickel plated Screw kit: Stainless steel
	O-ring: Silicone rubber Desiccant cartridge housing: Brass
