

The hoisting grip consists of a wire mesh with 1 hoisting eye, lace up version

FEATURES / BENEFITS**Antenna Transmission Line Installation**

- Hoisting stockings distribute the force during installation
- It holds the antenna transmission line by means of friction over their complete length
- The closed version (C-Type) is used when top connector is installed after the antenna transmission line is hoisted
- The open version (L-Type) is used where the top connector is installed prior to the hoisting

**External Document Links****Notes**

Maximum cable length per hoisting grip

Cable type	Length [m]
LCF78	60
HCA78	60
UCF78	60
EP100	100
