

RFS Class 4 antennas are designed to provide the market's best RF performance and allow mobile operators to deploy new microwave links even in ultra-dense areas where high levels of interference are present.

- Available from 15 to 42 GHz frequency in both single (SL) and dual polarization (SLX) versions
- Support for winds up to 250 km/h (155 mph) and even 320 km/h (195 mph) for 0.3m antennas diameter
- An optional sway bar for antennas 1 m (3ft) and larger is available

**FEATURES / BENEFITS**

- Increase link capacity of the network
  - Improved radiation patterns for ETSI Class 4 providing better performance
  - Less interference and higher carrier-to-interference ratio
  - Allows radios to operate at higher modulation levels
- Minimize the total cost of ownership
  - Improved network efficiency
  - Facilitates better re-use of a frequency channel
  - Small antennas with better link throughput reduces tower leasing fees
- Easy to install
  - Very low weight
  - Compact mounting system
  - Lower cost of installation
- In-field upgrades – flexible feed design
  - Upgrade from single to dual polarization in the field
  - Build for the future – upgrade to the next generation radio in the field
