

SMA-R06-W

Radome for 6ft high performance or ultra high performance antenna, white

Flexible radomes are used for High Performance and Ultra High Performance antennas 4 to 15ft. The flexible radomes protect against the accumulation of snow, ice and dirt, and reduce windload. The radome has a ventilating slot for equalisation of pressure. The radome is equipped with the RFS logo.

FEATURES / BENEFITS

- Protection of feed against environmental impact
- Reduced windload
- Lowest impact on electrical characteristic like gain, return loss (VSWR), attenuation

Picture shows Radome kit on 6ft antenna Shroud, Reflector and Mount not included

Technical features

MECHANICAL PROPERTIES

Diameter	ft (m)	6 (1.8)
Approximate Weigh	kg (lb)	7.5 (16.5)

STRUCTURE

Radome Material	PVC coated fabric	
------------------------	-------------------	--
