

RFS TPS\* series of Tappers unevenly split high power cellular signals in fixed ratios from 30:1 to 2:1 with minimal reflections or loss over the wireless bands in the range 350 - 2700 MHz. The innovative asymmetric design ensures an excellent input VSWR and coupling flatness across the band. The lightweight design allows easy attachment to a wall. Designed with only a few solder joints and an air dielectric, loss is minimized and reliability enhanced.
