PrimeLine Antenna, Ultra High Performance,  
High Cross Polar Discrimination, Dual Polarized, 10ft

RFS PrimeLine Antennas are designed for all microwave applications that require best RF performance, especially where interference could be an issue.  
A choice between tested and validated ultra-high (ETSI EN 302 217 Class 3 and FCC Class A) electrical performance.

Sizes ranging from 0.6 m (2 ft) to 4.6 m (15 ft)

Dual-polarized models with the ability to change frequencies in the field in most cases

**FEATURES / BENEFITS**

- Extremely high XPD performance for complete isolation between the radions in each polarization
- Excellent radiation pattern envelope (RPE), particularly in cross-polar area
- Support for winds up to 200 km/h (125 mph) with high-wind versions that support winds up to 252 km/h (155 mph) and an optional sway bar for added assurance in case mistakes are made during installation
- A single-piece or a split-reflector configuration and compact packaging to reduce transportation costs
- 8 ft (2.4m) to 12 ft (3.7m) diameters can be ordered in split reflector configuration too. The split design provides a reduced packaging volume which minimises shipping cost.
- The expected degradation of the XPD for split design reflectors is less than 2 dB due to the special method of reassembling the reflector on site.
- Frequencies ranging from 4 GHz to 15 GHz with support for one ultra wideband frequency range (5.725-7.125 GHz) to reduce antenna requirements and simplify logistic
