RFS appoints Gopal Naidu Vice President Broadcast Solutions

Kilsyth (Australia), February 7, 2017 – Radio Frequency Systems (RFS), a global designer and manufacturer of cable, antenna and tower systems providing total-package solutions for wireless and broadcast infrastructure, has promoted Gopal Naidu to the position of Vice President Broadcast and Defense Systems and General Manager of the Australian production facility. The appointment is effective immediately; Gopal has been acting in the role since September 2016.

Gopal Naidu has been employed in finance roles with RFS since 2000 and has extensive financial management experience both as a qualified and chartered accountant. “For the future direction, I intend to grow our services business in the broadcast and defense sectors by extending the planning, installation and commissioning capabilities that we already have. In the coming period RFS will be working hard to supply broadcasters who are assigned new frequencies as a result of the US spectrum auction and in the similar repack projects occurring in Europe. On other continents, the digital transition continues and the RFS broadcast portfolio has the complete range of antenna, combiner and filter products to address all global standards,” said Gopal with conviction.

Gopal Naidu began his career in the car industry with Toyota Motor Corporation before joining Edson Metal Plating and later, Nichiyu Australia, manufacturing entities where he held accounting and financial management roles. At RFS he has had an involvement with the operational side of the business from financial perspectives and is committed to lean manufacturing philosophy.

Gopal Naidu graduated from Deakin University, Melbourne with a Bachelor of Business (Accounting) in 1986.
