RFS Introduces Trisector Antennas for Markets in Latin America

The Cost-Effective Solution Incorporates an Inventive Configuration of RFS Base Station Antennas

Sao Paulo (Brazil), March 7, 2017 – Radio Frequency Systems (RFS), a global designer and manufacturer of cable, antenna and tower systems providing total-package solutions for wireless and broadcast infrastructure, introduces Trisector, a customized solution of “tri antennas” commercialized in Latin America by RFS.

Matching the needs of customers in Latin America, this cost-effective solution gathers three conventional antennas in a single radome providing a low visual impact design with high operational efficiency. Since its inception, hundreds of trisector units have been sold in different countries in Latin America. RFS decided to invest in its local production based on the specific challenges facing operators in the region. RFS is one of the pioneer companies in LATAM to offer the market multi-band solutions for single, dual, triple and quadriband antennas at all frequencies.

Moreover, the solution is a great fit for smart cities where the need for modern urban telecom infrastructure is critical. “Trisector permits the installation of antennas in a smaller area, reducing the rental costs of the location”, says Diego DiCarlo, RFS Technical Sales. “Furthermore, the structure’s compact design provides a lower wind load as well as a lower visual impact, camouflaging itself in the urban sightline thus helping us to meet our customer’s requirements”, he adds.

About RFS

Radio Frequency Systems (RFS) is a global designer and manufacturer of cable, antenna and tower systems, plus active and passive RF conditioning modules, providing total-package solutions for outdoor and indoor wireless infrastructure.

RFS serves OEMs, distributors, system integrators, operators and installers in the broadcast, wireless communications, land-mobile and microwave market sectors. As an ISO compliant organization with manufacturing and customer service facilities that span the globe, RFS offers cutting-edge engineering capabilities, superior field support and innovative product design. RFS is a leader in wireless infrastructure.
